Required Minimum Hardware Configuration For KLiC Exclusive 2018

PC Type	Processor Speed	No. Of Processor Cores	RAM	HDD Capacity
Client	1.6 GHz	2	4 GB	160 GB
Server	2.4 GHz	2	8 GB	500 GB

Minimum/Maximum Client-Server Requirement For KLiC New Center Registration Process 2019

Minimum Servers:	1
Maximum Servers:	1
Minimum Clients:	2
Maximum Clients:	40

Year

Hardware And Software Details Of Center (WORM)

Note :-

Please select & save Server Location to advance to the next step.

Sr.No.	Computer Details	Upload Date- Time / Approval Date- Time	Activated Softwares	Status	Location	Declare The Machines For MS- CIT Final Exam
--------	------------------	--	------------------------	--------	----------	--

For uploading server details, Open Worm server on the server PC and put AO code and password used for solar login

The screenshot displays a Windows desktop environment with various application icons on the left. A window titled "WORM: IT Infra Asset Monitoring Framework" is open in the center. The window contains a welcome message and a list of instructions for users. Below the instructions is a login section with fields for "User name:" and "Password:". In the top right corner of the desktop, system information is displayed, including the Host Name (SUSENN), Machine Domain (MKCLINDIA), MY PC IP Address (10.1.60.238), and PC DNS Server (fe80::34be:2a18:25ec:6736, 10.1.70.104, 10.2.10.20). The WORM Server icon on the desktop is highlighted with a red box.

Host Name: SUSENN
Machine Domain: MKCLINDIA
MY PC IP Address: 10.1.60.238 fe80::34be:2a18:25ec:6736
PC DNS Server: 10.1.70.104 10.2.10.20

WORM: IT Infra Asset Monitoring Framework

Welcome Center Co-ordinator!

Please take note that this software scans hardware-software details of your computers in LAN and uploads to central server for further verification as a part of your center's authorization process. Please take note of following points to avoid any problem.

1. All computers must be connected through local area network.
2. Direct Internet connection to server is required. In some cases, Proxy server/Firewall/Anti-virus settings/policies doesn't allow connectivity with centralized server. So, please make sure for necessary settings on your server.
3. This software automatically checks hardware configuration as per defined minimum criteria and restrict user from uploading details.
4. This software also checks duplicate computers and rejects automatically.
